Monthly Complaints Report – Momentum Industrial Estate – September 2023			
Date	Nature of Complaint	Avoidable / Unavoidable / Unrelated	Proponent response / action taken
14-Sep	Stakeholder called to complain of significant and continual dust pollution on his property. Dust regularly covers his lawn and drive. Dust is also contaminating his water tank water which is used in the house. He can't park his car outside for any length of time without it getting dust all over it. He can see that there is a water truck onsite, but he says this is not sufficient. He understands the site will omit dust but it's at a point where its not acceptable. He is planning to go to council if it's not reconciled soon.		
	As a secondary, less critical, complaint he also raised persistent breaking of the 3pm work curfew.	Unavoidable.	Ongoing.
